What can you do in cPanel?

cPanel & WHM Created on **August 14, 2026** Updated on **October 21, 2026** 3 min read

cPanel is the control panel included with your hosting plan. Everything about your site - files, e-mail, databases, domains, security and backups - is managed from a single screen, with no technical knowledge required. This page is a map of what you will find there.

Files and websites

File Manager	Upload, edit, move and delete files straight from the browser, without an FTP program.
FTP Accounts	Create separate logins for a designer or developer, limited to one folder.
Backup	Download a copy of your site and databases, or restore a previous one.
Disk Usage	See which folders are taking up the most space.

E-mail

Email Accounts	Create addresses on your domain - see **how to create one**.
Forwarders	Send a copy of everything arriving at one address to another.
Autoresponders	Automatic replies for holidays or out-of-office periods.
Spam Filters	Adjust how aggressively unwanted mail is filtered.
Webmail	Read your mail in the browser, without configuring anything.

Domains

Subdomains	Create addresses such as *shop.yourdomain.co.mz* or *blog.yourdomain.co.mz*.
Addon Domains	Host a second, completely separate website on the same plan.

Redirects	Send one address automatically to another.
Zone Editor	Manage DNS records, to point the domain at an external service.

Databases and applications

MySQL Databases	Create databases and users for your site.
phpMyAdmin	View and edit database content directly.
Application installer	Install WordPress, Joomla, PrestaShop and dozens of others in a few clicks, with no manual setup.
Select PHP Version	Change the PHP version and enable the extensions your site needs.

Security

SSL/TLS Status	Check the certificate that puts the padlock on your site. It is issued and renewed automatically.
IP Blocker	Block addresses that are abusing your site.
Directory Privacy	Require a password to open a particular folder.
Hotlink Protection	Stop other sites from embedding your images and consuming your bandwidth.

Statistics

Visitor reports, bandwidth consumption, error logs and access logs - useful for understanding traffic and spotting problems early. See **how to monitor your site**.

Which plans include cPanel

cPanel comes with every shared hosting, WordPress and reseller plan:

Range	Plans
Hosting	Hospedagem Pro · Plus · Ultra · Business Pro · Business Plus · Business Ultra
WordPress	WP Starter · WP Perfomance · WP Pro
E-mail	E-mail Pro · E-mail Plus · E-mail Ultra
Reseller	cPanel-RI · cPanel-RII · cPanel-RIII - these also include WHM, for managing your clients' accounts

VPS and dedicated servers can have cPanel as an optional licence. Not sure what your plan includes? Check it under **My Services** in **My Interweb**.

NEED A HAND?

Cannot find a feature, or not sure which one you need?

SEE ALSO

The most requested of all:
How to install WordPress in a few clicks

If you resell hosting, the panel is a different one:
First steps as a reseller (WHM)

If the site is WordPress, there are plans built for it.

WEB HOSTING

Looking for hosting that stays out of your way?

cPanel, a free SSL certificate, backups every night before dawn kept for a year, and support that answers in your language.
