Monthly points and renewal: which Coding Plan limit counts first

Coding Plan Created on **November 28, 2026** 2 min read

The Coding Plan has two limits: the weekly points and the monthly points. Whichever runs out first counts.

The two limits of each plan

Plan	Points per week	Points per month
Starter	16.5 million	33 million
Lite	33 million	66 million
Plus	82.5 million	165 million
Max	165 million	330 million
Ultra	330 million	660 million
Enterprise	825 million	1,650 million

In every plan, the monthly limit is twice the weekly one. If you use all your weekly points every week, the monthly ones are gone after two full weeks.

When the month comes back

Monthly points count from the start of the subscription period and come back on each renewal, on the day of purchase, not on the 1st. The **Plan tab** shows the date in "Renews on" and in the This month bar. Through the API, it is `monthly_resets_at` in `GET /v1/ai/balance`.

Which of the two ran out

With "Use credits when the plan runs out" off, or with no credits, the API answers `429 plan_limit_reached`. `details.limit` says which one ran out: `weekly` or `monthly`. `details.resets_at` says when they come back: **the error, field by field**.

If the month always runs out early

It means the plan is small for the way you work. Move to a bigger one with **Change plan**, in the Plan tab, or keep credit use on for the busiest days.

If the plan invoice goes unpaid, the plan is suspended. Requests stop using points and are paid with your credit balance. Pay the open invoice to use the plan again.

RECOMMENDED

Want a plan that fits the way you work? Visit the Coding with AI page.
