Hosting providers in Mozambique: what to compare before deciding

Comparisons and alternatives Created on **August 16, 2026** Updated on **October 15, 2026** 5 min read

By the Interweb editorial team · Updated 15 October 2026 · Data from the providers' public pages, consulted in October 2026.

Mozambique has few hosting providers, and almost all of them say the same thing on the front page: fast, secure, with **support**. That does not help you decide. What helps is knowing **which questions to ask** - and we answer them here too.

The eight points that decide it

1. **What currency do they charge in?** Some Mozambican providers show prices in dollars. Not a flaw, but it means the final amount depends on the day's rate and your card's fees.

2. **Do they register .mz domains?** Not all do. If they do not, you end up with hosting in one place and the domain in another.

3. **Which panel do they use?** cPanel and Plesk are market standards and make leaving easier later. A proprietary panel locks you in more.

4. **How do backups work?** "We have backups" is not enough: how often, kept for how long, and is restoring free?

5. **Where do you ask for help, and at what hours?** A WhatsApp that answers at 9pm beats a form that answers in three days.

6. **What limits does the plan have?** "Unlimited" never is. Ask about CPU and process limits - those are what make a site fail at peak times.

7. **Who migrates your current site?** And does it cost?

8. **What is the renewal price?** Not the first year. The second is the one you pay for a long time.

What each one publishes today

We looked at the public pages of the main Mozambican providers. This is what each one **advertised** on the date we checked - and only that; we did not test their services.

1. **TurboHost** - uses the **DirectAdmin** panel and advertises LiteSpeed, free SSL, 24/7, VPS and reseller. Prices show **in dollars** by default, although the site offers metical and kwanza.

2. **Registar (registar.co.mz)** - advertises LiteSpeed, daily backups, SSL and .mz domains, with prices in meticais and dollars. Note: it uses *mozdomains.com* nameservers, suggesting the same house behind two brands.

3. **Interweb** - cPanel, free SSL, backups every night before dawn kept for a year, .mz domains registered with CIUEM and transferred free, invoices in meticais and support in Portuguese: **WhatsApp, ticket and e-mail 24 hours**, phone from 08:00 to 16:00.

Checked on each provider's public pages in August 2026. They may have changed since - confirm before deciding.

What a table cannot compare

Two things decide the experience and appear nowhere: **how long they take to answer when the site is down**, and **what happens when the problem is hard**. Before buying, send a technical question to each provider's support and see how long it takes and how good the answer is. It is the cheapest test you can run.

See hosting plans → **Search a domain →**

Changing provider is not a drama.
If you are somewhere and unhappy, migration happens without the site going offline and transferring a .mz costs nothing - see **how to transfer a domain** .
