Interweb or MamaHost: comparison and which to choose in Mozambique

Comparisons and alternatives Created on **August 16, 2026** Updated on **October 22, 2026** 5 min read

By the Interweb editorial team · Updated 15 October 2026 · Data from the providers' public pages, consulted in October 2026.

MamaHost is a known brand in the Mozambican market. On 15 October 2026 the website mamahost.co.mz showed a technical error page, so its plans and prices are not stated here; confirm them directly with the provider.

Both are local providers, both sell hosting and domains. The short answer: **on the basics they are similar**, and the choice comes down to three or four details. Let us go through them one by one.

Hosting and panel

1. **Interweb** - **cPanel** on Linux hosting and **Plesk** on Windows hosting, with CloudLinux, free SSL and Imunify360. Clear per-account limits - that is what stops a neighbour's site ruining your day.
2. **MamaHost** - Not stated on the public pages consulted; check with the provider.

Domains

1. **Interweb** - **.mz registered with CIUEM** by us, with a **DNS manager in the panel** and nameserver changes you make yourself, at any hour.
2. **MamaHost** - Not stated on the public pages consulted; check with the provider.

How you pay

1. **Interweb** - **Meticais**, with a local invoice your accountant accepts.

2 **MamaHost** - Not stated on the public pages consulted; check with the provider.

Backups

1 **Interweb** - **Every night before dawn, kept for a year**, restored through JetBackup from the panel.

2 **MamaHost** - Not stated on the public pages consulted; check with the provider.

Customer support

1 **Interweb** - **WhatsApp, panel ticket and e-mail 24 hours a day**, plus **phone calls from 08:00 to 16:00** - all in Portuguese, with a written record of everything asked and done kept in the panel.

2 **MamaHost** - Not stated on the public pages consulted; check with the provider.

For companies: VPS and reseller

1 **Interweb** - VPS, Cloud, dedicated and reseller. Servers are **unmanaged** by default - delivered with the OS and full access.

2 **MamaHost** - Not stated on the public pages consulted; check with the provider.

Main differences

	Interweb	MamaHost
Panel	cPanel (Linux) and Plesk (Windows), with CloudLinux and Imunify360	Not stated on the public pages consulted; check with the provider.
National domain	.mz with CIUEM	Not stated on the public pages consulted; check with the provider.
Currency	Meticais, with a local invoice	Not stated on the public pages consulted; check with the provider.
Backups	Nightly, kept 1 year, self-service restore	Not stated on the public pages consulted; check with the provider.
Support	WhatsApp, ticket and e-mail 24h; phone 08:00-16:00	Not stated on the public pages consulted; check with the provider.

Where MamaHost is strong

It is an established Mozambican brand. If you are considering them, contact them directly - a site down on one day says nothing about their service.

Why we recommend Interweb

If you want **everything in one place and in local currency**: national domain, hosting, e-mail and invoice on one account. We are among the few who state in writing **how long backups are kept** - one year - and let you **restore them yourself** from the panel, with no ticket and no waiting. Add **CloudLinux**, which stops a neighbour's site ruining your performance, **Imunify360** against malicious code, **free SSL that renews itself**, **free migration of your current site**, **free .mz transfers**, over **100 domain extensions** and one-click WordPress.

Entry price: the **Hospedagem Pro** plan starts at **MT 900/month** (10.800 a year), with SSL, backups and cPanel included. *Price current in August 2026 - check the store for today's figure.*

In short.
For a business in Mozambique - with a national domain, an invoice in local currency and someone who answers any hour by WhatsApp, ticket or e-mail - **Interweb** is the choice we recommend. And if you ever change your mind, you take everything with you, with no fee.

The test worth more than this article.
Before deciding, send a technical question to both support teams and compare how long they take and how good the answer is. That applies to them and to us - it is how you judge a provider.

The MamaHost website was consulted on 15 October 2026 and showed a technical error page. We did not test their services, and the information may have changed since. If you spot anything out of date, tell us and we will correct it.
