<https://www.meu.interweb.co.mz/knowledgebase/2272>

The short answer: every hosting plan (Pro, Plus, Ultra and the three Business plans) runs on cPanel and includes **SSH access** (with the cPanel Terminal), **MySQL/MariaDB and PostgreSQL** databases, unlimited e-mail accounts on your domain, a free SSL certificate and an **automatic backup every day, kept for 30 days**. What changes from plan to plan is **how many sites** you can host, the **disk space** and the **e-mails per hour**. So yes: the Pro plan has SSH.

Plan by plan

Plan	Sites	Space	E-mails per hour
Pro	1	10 GB SSD NVMe	100
Plus	6	20 GB SSD NVMe	200
Ultra	Unlimited	30 GB SSD NVMe	300
Business Pro	Unlimited	50 GB SSD NVMe	500
Business Plus	Unlimited	100 GB SSD NVMe	750
Business Ultra	Unlimited	200 GB SSD NVMe	1,000

Checking what your plan includes, and using it

1

Find the name of your plan in Meu Interweb, under Services. That is the name to look for in the table above.

2

SSH: log in to cPanel and open the Terminal, with nothing to install (**the cPanel Terminal**), or connect from outside with a key (**SSH on your hosting account**).

3

PostgreSQL: it is in cPanel, next to MySQL. The steps are in **PostgreSQL in cPanel**.

4

E-mails per hour: check how many you have sent in the current hour in **how many e-mails you sent this hour**.

5

Need more sites or space? You can move up a plan at any time without losing your site: **which plan comes next**.

Traffic, e-mail accounts, databases and FTP accounts are unlimited on every plan, but each account has server usage limits (processor, memory, processes). If you keep reaching them, the way forward is a bigger plan: **what really is unlimited**.

The **Windows** plans (Plesk) and the **Professional E-mail** plan have the same limits as the Linux plans with cPanel. PHP, Python and Node versions are chosen in the panel itself. To choose between plans, see **Pro, Plus, Ultra or Business**.

Not sure which plan you are on, or need something the table does not answer?
Ask us.
